

Leonardo Bellido

Frontend Developer

leobellido@gmail.com · linkedin.com/in/leonardo-bellido · Argentina · Remote

PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of experience building production web applications for external clients. Specialized in React and TypeScript, with hands-on end-to-end involvement: from UI development to database validation and backend integration testing. Solid working knowledge of Java and SQL enables effective cross-team collaboration and full-system understanding. Remote-first professional with a strong focus on writing components that are readable, maintainable, and built to scale.

WORK EXPERIENCE

Frontend Developer · Baufest · Argentina (Remote)

Dec 2022 – Dec 2025

Project: Real-Time Radar & Monitoring Consoles

- Built mission-critical interfaces adopted by external clients in high-complexity environments, reducing friction for operations and support teams.
- Integrated WebSockets for real-time data streaming, delivering a smooth dashboard experience under high update frequency.
- Participated in end-to-end testing and database validations, collaborating closely with backend engineers to ensure data consistency.
- Led the definition of React/TypeScript component standards, improving code consistency and reducing onboarding time for new developers.

Project: Banking Platforms

- Delivered frontend features used by thousands of users, with a focus on performance, accessibility, and user experience.
- Built a reusable component library documented with Storybook, accelerating feature development and standardizing design across teams.
- Managed global application state with Redux Toolkit, applying patterns that facilitated long-term maintainability in mid-to-large scale apps.
- Collaborated with backend teams on REST API integrations, participating in contract validation and cross-layer data flow testing.

Process & Collaboration

- Actively participated in code reviews and refactoring sessions, improving overall codebase maintainability and readability.
- Worked in cross-functional Scrum teams with a focus on continuous delivery and iterative improvement.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Redux Toolkit, Storybook

Backend & Databases: Java (working knowledge), SQL (queries and data validation)

Tools: Git, WebSockets, REST APIs

Methodologies: Scrum / Agile, Code Review, Component-Driven Development, E2E Testing

EDUCATION

Associate Degree in Software Development

Advanced student · In progress

Universidad del Chubut · Argentina

LANGUAGES

Spanish: Native · **English:** B1 — Professional reading and writing proficiency
